Work Experience

Copyright Integrity International | Associate Monitoring Enforcements

Processed and refined sports content data from Google Sheets to facilitate the identification of copyright infringements. across digital platforms. Analyzed datasets, ensured data accuracy, and collaborated with the enforcement team to validate violations, supporting authorized takedowns of 20+ unauthorized content sources.

Kone Technology, Bangalore | Python Developer Intern

Expanded and streamlined Python-based applications to improve functionality and user experience. executed machine learning algorithms under senior guidance to enhance data processing efficiency by 20%. Participated in code reviews to ensure high software quality, maintainability, and adherence to best practices

Educational Detail's

Master's in Data Science, IIT Guwahati, Besant Technology
MCA - Acharya Institute of Technology, Bangalore
BCA - Ideal Degree College
Pre-University (Commerce), Government PU College.

Project Work

Cloud Resource Management Database |SQL, MYSQL Work Bench:

Designed and enforced a cloud resource management database to manage users and services providers, resources, allocations, and billing data. Applied database normalization up to 3NF with primary and foreign keys to ensure data integrity and scalability. Enabled tracking of the resource utilization and cost monitoring.

Healthcare Cost & Insurance Claim Analysis | Python, MySQL, Power BI:

Analysed 2,500+ healthcare insurance claim records using Python (Pandas, NumPy). Built Power BI dashboards to visualize spending trends by region, treatment type, smoking status, and age. group to identify major cost drivers.

Resume Matcher (LLM + RAG Based AI System):

Developed an intelligent Resume Matcher using Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) to analyse and rank candidate resumes against job descriptions.
Applied semantic search and embedding techniques to improve matching accuracy and contextual understanding.
Built a scalable pipeline using Python for data preprocessing, vector storage, and real-time inference.
Enhanced recruitment efficiency by automating candidate screening and delivering explainable AI-driven insights

Skills

- **Programming:** Python, SQL, Machine Learning, Artificial Intelligence, Deep Learning.
- **AI / ML Frameworks:** TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers
- **Generative AI:** Large Language Models (LLMs), Prompt Engineering, Retrieval Augmented Generation (RAG), Langchain
- **Data & Analysis:** Pandas, NumPy, Matplotlib, ETL & Data Processing
- **Visualization:** Power BI, Dashboard Development
- **Cloud & DevOps:** Microsoft Azure, REST APIs, Docker (basic)
- **Development Tools:** Jupyter Notebook, VS Code, MySQL Workbench, GitHub

Achievement

- Figma Certificate: https://www.coursera.org
- Python Developer
- Artificial Intelligence & Machine Learning
